

## CORE COMPETENCIES

- Cybersecurity & Risk**  
 Pen testing, red teaming, NIST 800-53, FedRAMP, CMMC
- AI & Intelligent Automation**  
 Governed generative & agentic AI, NIST AI RMF
- Data & Analytics**  
 Cloud data lake migration, analytics, AI-ready data
- Cloud Solutions**  
 Cloud-native, migration, FedRAMP-aligned operations
- DevOps & DevSecOps**  
 Secure CI/CD, IaC, containers, ATO acceleration
- Enterprise Applications & ERP**  
 SAP, Oracle, Microsoft, Manhattan, integration
- App Development & Modernization**  
 Custom build, legacy modernization since 1998
- IT Staffing Services**  
 Cleared, pre-vetted talent, two-week time-to-fill

## DIFFERENTIATORS

- ✓ Integrator model.** Single accountability across assess, architect, staff, implement, govern, and support, reducing the coordination risk of multi-vendor programs.
- ✓ Cleared talent on demand.** Security-cleared specialists across every capability, available for controlled environments with a typical two-week time-to-fill.
- ✓ Governance built in.** AI that is logged, auditable, and reversible, aligned to the NIST AI Risk Management Framework, with compliance engineered into delivery.
- ✓ Proven federal experience.** Exclusive PSC Federal partnership and Army PEO EIS contract experience, backed by the scale of System Soft.
- ✓ Engineering heritage.** Software engineering firm since 1998, now a full IT integrator with 25-plus years of delivery discipline.

## REPRESENTATIVE PAST PERFORMANCE

- Federal modernization.** Re-platformed a legacy agency system and integrated it with existing cloud and data services, improving reliability and reducing maintenance burden.
- Health data & automation.** Automated high-volume claims and eligibility workflows for a health program while meeting HIPAA and MARS-E controls.
- Cybersecurity & compliance.** Delivered penetration testing and NIST 800-53 readiness ahead of an Authority to Operate, accelerating the authorization timeline.
